

BLUE MOUNTAIN PATHOLOGY, INC.

TREATMENT RECOMMENDATIONS FOR ABNORMAL PAP SMEAR RESULTS*

PAP RESULT	PATIENT AGE / STATUS				
	20 years or younger	21 years or older & Premenopausal	Postmenopausal (at any age)	Pregnant	
				20 yrs & younger	21 yrs & older
ASC-US	Repeat Pap in 12 months	HPV test or Repeat Pap in 6 & 12 months or Colposcopy	HPV test or Repeat Pap in 6 & 12 months or Colposcopy	Repeat Pap in 12 months	HPV test or Repeat Pap in 6 & 12 months or Colposcopy (w/o endocervical samplings) or Further testing may be delayed until after birth
LSIL	Repeat Pap in 12 months	Colposcopy	HPV test or Repeat Pap in 6 & 12 months or Colposcopy	Repeat Pap in 12 months	Colposcopy (w/o endocervical samplings) or Further testing may be delayed until after birth
HSIL	Colposcopy	Colposcopy or LEEP	Colposcopy or LEEP	Colposcopy (w/o endocervical sampling)	Colposcopy (w/o endocervical sampling)
ASC-H	Colposcopy	Colposcopy	Colposcopy	Colposcopy (w/o endocervical sampling)	Colposcopy (w/o endocervical sampling)
AGC-all <u>except</u> atypical endometrial cells	Colposcopy with endocervical sampling & HPV testing	Colposcopy with endocervical sampling & HPV testing & endometrial sampling (if older than 35 yrs, or at risk for endometrial neoplasia)	Colposcopy with endocervical sampling & HPV testing & endometrial sampling (if older than 35 yrs, or at risk for endometrial neoplasia)	Colposcopy (w/o endocervical or endometrial sampling) & HPV testing	Colposcopy (w/o endocervical or endometrial sampling) & HPV testing
AGC-atypical endometrial cells	Endometrial & endocervical sampling followed by colposcopy & HPV testing	Endometrial & endocervical sampling followed by colposcopy & HPV testing	Endometrial & endocervical sampling followed by colposcopy & HPV testing	Colposcopy (w/o endocervical or endometrial sampling) & HPV testing	Colposcopy (w/o endocervical or endometrial sampling) & HPV testing

Key: ASC-US – atypical squamous cells of undetermined significance. LSIL – low grade squamous intraepithelial lesion. HSIL – high grade squamous intraepithelial lesion. ASC-H – atypical squamous cells, cannot exclude HSIL. AGC – atypical glandular cells. HPV – human papilloma virus. LEEP – loop electro-surgical excision procedure.
